## CHOOSE THE FASTENER THAT IS BEST FOR YOUR NEEDS!

Standard Fasteners and Attachers work well with most fabrics – cotton, knits, woven fabrics or tags on toys or other heavier fabrics. Using TAGS-40948, the standard fasteners and a standard needle, you can tag most products.

Fine Fasteners and Attachers are for use with delicate fabrics, or where you want little to no detection of the needle hole or any possible damage to your products. Using the Fine attacher, TAGS-40949, with the fine needles and fasteners can give you the results you are looking for.

For higher productivity and less changing out of the fastener clips, purchase the 75 or 100 clip versions. It is recommended to replace needles after applying a case of fasteners – this helps with smooth operation of the attacher.
